The majority of borrowers looking to buy/expand a business or franchise typically are in need of bank financing. Obtaining such loans is very challenging in today's market and there is very little sign that this is going to change any time soon. **401k's and IRA's** are two of the last bastions of wealth that people have available to tap. The problem is there are huge tax ramifications if you liquidate them. **This program allows you to tap these securities and incur NO tax ramifications - This is HUGE!**
